

NEW EQUIPMENT

Plain Paper Reader-Printer

The ALOS Z40 is an economical, compact, energy-efficient, plain paper reader-printer that offers Zoom lens capability. This unique feature enables the operator to change magnification, view, and print; all without changing a lens.

For convenience and ease of operator use, all controls are located in the front of the machine. Space conscious in design, prints exit up front in the built-in paper tray, allowing the Z40 to be used in small work areas.

Using an exclusive imaging process, the ALOS Z40 achieves affordable print costs, while keeping the cost of maintenance down.

The ALOS Z40 is attractively designed and will complement any office decor. Reliable and efficient, durably constructed, and simple to operate, the Z40 represents unsurpassed productivity in its class.
