

NEW EQUIPMENT Microfilm Duplicator

ALOS®

Silver Film Duplicator 81S

The ALOS Silver Film Duplicator 81S is an extremely versatile unit for producing high quality 16 or 35mm silver halide rollfilm duplicates.

Master films may be silver or non-silver; or positive or negative. Suitable for applications of all sizes, the ALOS 81S copies at a fast fixed speed of 32 feet per minute.

This portably sized unit is streamlined in design for compactness, cost-effectiveness and simple operation – just load the film, adjust the light intensity if necessary, and switch the unit on. Shuts off automatically at the end of the duplication cycle, permitting unattended operation. May be operated in daylight conditions.

The ALOS 81S has been brilliantly engineered to produce duplicates the finest quality. Features a unique direct film drive, a highly precise exposure system, and a removable film cassette.
