size desired. Our systems representative will assist you to "tailor fit" your work station needs.

■ Pedestals For Tables - Full range available - contact us for

VSM-4 Micrographic Work Station offers a reliable solution for active retrieval system applications. Accessibility to retention media is assured by means of efficient cross-tray filing. Microform trays in microfiche and aperture card configurations include compressors, providing proper form protection. Per drawer capacity permits four microfiche trays, three aperture card trays, or six rows of microfilm. Adjustable dividers may be used in lieu of trays but require magnetic compressors. When used in work station applications, an optional T-6030 side extension top is available. A wide range of standard finishes and laminates are available with special colors upon customer's request.

information on a wide selection of pedestals.

■ Colors Available - Putty, Light Tan, Brown, Black, Bamboo, Charcoal.

■ Top Patterns - Light Oak, Medium Oak, Walnut, Teak, Off White.
