

RECONDITIONED EQUIPMENT – DELIVERY & SPECIAL SERVICE

INTRODUCTION TO RECONDITIONED EQUIPMENT

ALTEK SYSTEMS, a division of Allied Technology, Inc., has been dedicated to providing micrographic users top quality reconditioned equipment since 1978. We sell our used and reconditioned equipment by class- from Class I to Class V. This system provides an honest assessment of the equipment, and further guarantees you, our valued customer, full value for each piece of equipment you purchase. At ALTEK SYSTEMS, our "Solid Gold" commitment applies to YOU!

EXPLANATION OF CLASSES OF USED EQUIPMENT

CLASS I:

Strictly "retail" machines; equipment is refurbished and will contain only minor discoloration, scratches, etc. to distinguish it from a new unit. It comes with a full 30 day parts and labor warranty.

CLASS II:

This is "very good" reconditioned equipment. A cursory glance will reveal it is used equipment that has been repaired. It may have evidence (scratch, discoloration, etc.) from normal use visible. The function of these units will still be equivalent to new equipment. It comes with a 30 day parts guarantee.

CLASS III:

This is "average" working equipment. Its appearance will reflect a very well used machine with unretouched scratches, abrasions, etc. Outside panels may show wear and breakage. We have made no effort to refurbish these units other than to make certain they cycle. Their performance may be somewhat inferior to new units, i.e., slower, not quite as good an image, etc. They will be working machines and will carry a 30 day parts guarantee.

CLASS IV:

"As-Is" machines. These are complete machines that may or may not be working. Suitable for rebuilding, these machines will be sold with no guarantees other than they will be complete.

CLASS V:

"As-Is" non-working parts machines. These machines are incomplete and non-working. They are suitable only for parts or extensive rebuilding. No guarantee of any kind applies.

DELIVERY

ON LAMPS AND SUPPLIES: Ship stock supply items within 24 hours. Call our supply HOTLINE at (800) 627-1123 for immediate response!

ON REFURBISHED EQUIPMENT: Shipping time on equipment which we have in our warehouse is typically ten working days. On "In Transit" equipment which has not reached our dock, we request you allow us 30 days for shipment.

ON NEW EQUIPMENT: This depends on the manufacturer! Call your ALTEK Representative for a shipping date.
