### For Film Processing...

Sequentially Numbered TWIN CHECKS: Put one on the processed film, and one on the box – avoids mix ups!

All of our Film Checks are printed on white acrylic based adhesive.

Triple Checks  
Packaged: 3000 labels per roll

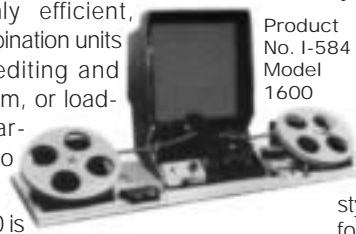

## Editor - Loaders

### Model 1500 & 1600 Editor-Loaders

The Model 1500 and Model 1600 are economical, highly efficient, motorized combination units designed for editing and inspection of film, or loading film into cartridges or onto reels.

The Model 1500 is capable of loading film from 1000' Reels onto smaller Reels, M-Type Cartridges or ANSI Cartridges, or from Cartridges back onto 1000' Reels.

The Model 1600 will load film from 1000' Reels directly to other 1000' Reels or into M-Type or ANSI Cartridges. All units (Model

Product No. I-584  
Model 1600

1000, 1500, 1600) have a reverse switch for operation in either direction.

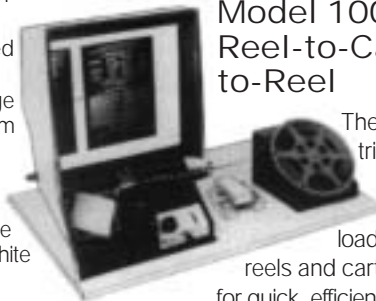

### Specifications:

- Standard 24x magnification
- 15" x 15" screen
- High or variable low speed operation
- Instant braking of large supply reel to prevent film pile-up
- Winds 100' of film in 15 seconds
- Tough, durable blue styrene cabinet mounted on white formica platform
- 100-125 VAC, 60 cycle, 4 amp
- Model 1500: 24" x 36" x 26"
- Model 1600: 24" x 48" x 26"
- Compatible with 3M, Kodak, Ektamate, and Bell & Howell systems

### Options:

- 32x, 42x, or 48x magnification
